

Pentra-Guard® (HP)

High Performance Industrial
Flooring Surface Hardener

P-Guard combines the durable protection of a penetrating densifier with the attractive finish of a high performance coating. The result-a beautiful,easy-maintenance finish that provides superior protection against abrasion, stains, oils, and many acids

Scania Truck Helsinki

Benefits:

- High gloss
- Excellent Abrasion resistance
- Stain resistance against oil,acids..
- Fast re-application when needed
- Water based
- SAFE User friendly formulation

Applications:

- Warehouses
- Restaurant
- Supermarkets
- Offices
- Schools
- Colored Concrete
- Acid Stained
- Terrazzo

METRO Shop Istanbul

Pentra-Guard™ (HP/S)

For High Polish Floor & Terrazzo
&
Maintenance Process.

The reactive micro-impregnating Nano Lithium™ polymer creates greater protection and greater gloss with less labor.

Specialy for finished stone and Terrazzo. This (H/PS) will be also a good maintenance product.

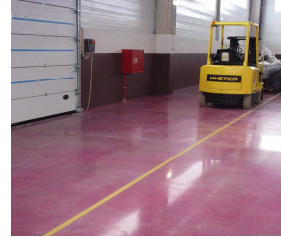

ADDIDAS Warsaw

PENTRA-STAIN™(UVS)

The Art of The Lithium Technology

Unique Lithium based technology to provide strength industrial performance and a attractive finish for interior concrete. This durable color penetrating sealer while providing a satin or a gloss finish. UV resistant, solvent free and a very small VOC.

TEXTILE Lisboa

PENTRA-PROTECTIVE COATING™

Solid Color for Industrial Topcoat

OTIS Spain

The topcoat and surface hardener is an ideal solution for new construction and maintenance projects that require superior protection against abrasion, corrosion, chemical abuse and easy re-coatability.

SELLO Mole Helsinki

Perfect for protecting concrete floors, ferrous metal, concrete block, aluminum/non-ferrous metal, asphalt, and previously existing coatings.

Pentra-Sil®

Nano-Lithium Technology

Pentra-Sil® (NL) HD+C

Nano-Lithium®
Hardener, Densifier & Cure

METRO Shop Germany

Pentra-Sil® (NL) HD+C is a water-based, clear, dissipating membrane-forming curing compound, hardener and densifier that surpasses ASTM C-309 Liquid Membrane – Forming Compounds for Curing Concrete moisture retention requirements

This patent pending, all-in-one lithium formula is applied to fresh concrete slabs. Classified Type I Class A & B.

Pentra-Sil® (NL)

Nano-Lithium®
Premium Lithium Technology

Benefits:

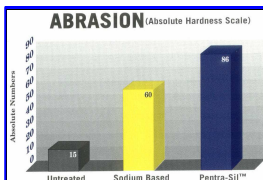

- Seals: micro-channels against water and chemical attack
- Hardens: making concrete stronger and more abrasion resistant
- Dust Proofs creating a cleaner, healthier environment
- Easy maintenance. Never needs waxing
- ASR SAFE
- Permanent one penetrating application is all that is needed.

Nestlé South Africa
Pentra-Sil®

Applications:

- Exposed Concrete
- Distribution
- Warehousing
- Manufacturing
- New and Existing Concrete

Pentra-Sil 244+®

Nano-Lithium®
Premium Salt Protection Technology

AUDI Belgique
PS 244+®

Jet Hangar Germany

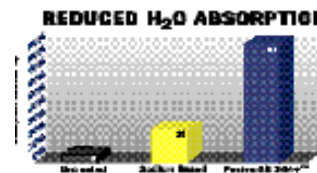

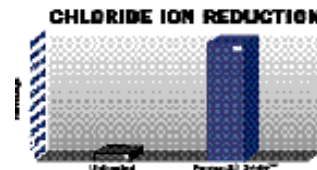

All the benefits of Pentra-Sil® plus an exclusive Chloride Ion screen to protect against salt.

Applications:

- Parking Decks
- Marine Environments
- Pedestrian Walkways
- Stamped/Colored Concrete
- Salt Exposed Areas
- Warehouse
- Factory

Benefits

- Chloride Ion Screen reduces salt penetration by 90% as tested by WJE-NCHRP244 procedures.
- Seals
- Hardens
- Dust Proofs
- Easy maintenance
- ASR SAFE

Manufactured exclusively by Convergent Group S.A. & Convergent Concrete Technologies
