

Technical Instruction Sheet

page 1 of 1

- Characteristics:** AKEMI® Handwash Cream is a cleaning agent based on anionic and non-ionic surfactants, glycol derivative and fine plastic powder. The product is distinguished by the following qualities:
- careful and gentle skin cleansing
 - no sharp-edged pulverised substances (e.g. sand) contained, but fine plastic powder
 - easy removal of coarse contamination, s. a. oil, soot, graphite, metal dust
 - care properties
 - the surfactants contained are biodegradable
 - pH-neutral
- Field of Application:** Handwash Cream is used in industry, trade and hobby, e.g. body shops, printing shops, metal-working plants etc.
- Instructions for Use:**
1. Thoroughly rub dirty hands with Handwash Cream.
 2. Thoroughly wash hands with water afterwards.
- Safety Measures:** see EC Safety Data Sheet
- Notice:** The above information is based on the latest stage of technical progress. It is to be considered as a non-binding hint and does not release the user from a performance test, since application, processing and environmental influences are beyond our realm of control.
