T-Rex™ Super

The next generation of T-Rex® tools are here. The new design and latest diamond technology provides unique advantages for the flooring contractor.

The new tooling series is a further development of HTC's previous T-Rex® tools. The developments give the tools their extreme properties, like an exceptional cutting ability, which is useful when removing thick floor coatings. An increased efficiency and life, which in turn provides an improved tool economy during floor preparation, are the main advantages with the new T-Rex® Super.

EZ T-Rex™ Super A
(Item Number: 212454)

Suitable for removing all types of coatings and coarse grinding. The tools have an exceptionally high removal rate, resulting in maximum efficiency.

EZ T-Rex™ Super A, Protect segment
(Item Number: 212455)

Suitable for removing all types of coatings and coarse grinding. The tools have an exceptionally high removal rate, resulting in maximum efficiency. Equipped with a protect segment.

EZ T-Rex™ Super B
(Item Number: 212456)

Suitable for removing all types of coatings and coarse grinding. The tools have an exceptionally high removal rate, resulting in maximum efficiency.

The B version is for HDX machines with counter rotating tool holders.

EZ T-Rex™ Super B, Protect segment
(Item Number: 212457)

Suitable for removing all types of coatings and coarse grinding. The tools have an exceptionally high removal rate, resulting in maximum efficiency. Equipped with a protect segment.

The B version is for HDX machines with counter rotating tool holders.
