

Proprietary Stain-Resistant Technology, *Plus* One-Part Convenience!

Dow Corning® 991 Silicone High Performance Sealant

The architects of the 15-story Capital Square Building in Singapore knew they needed a high-technology weather-proofing sealant that would not stain the sensitive granite cladding, yet still provide long-term protection against the tropical sun and monsoon weather. *Dow Corning® 991 Silicone High Performance Sealant* was the perfect solution and the product of choice.

Seal sensitive substrates with confidence

Granite, limestone, marble, masonry, metal and composite panels are outstanding materials to create distinctive building exteriors. But the choice of weatherproofing sealants can affect the long-term aesthetics of a building, because many sealants can stain sensitive substrates, leading to owner complaints.

Dow Corning offers a welcome option. *Dow Corning® 991 Silicone High Performance Sealant* is specially formulated for reduced dirt pick-up and fluid rundown. It's proprietary technology that provides long-term resistance to unsightly staining and streaking on sensitive building substrates.

A global product with a ten-year track record of success overseas, *Dow Corning 991 Silicone High Performance Sealant* is a one-part version of two-part *Dow Corning® 756 Silicone Building Sealant-H.P.*, which has an equally long track record in successful stain-resistant weathersealing applications in North America.

Durable weathersealing protection

A 100 percent, non-reverting silicone product, *Dow Corning 991 Silicone High Performance Sealant* cures to durable, flexible, weather-resistant seal with a traditional semi-gloss finish. Its medium modulus, high-movement capability can accommodate ± 50 percent movement in a properly prepared joint.

The skylights and sensitive composite panels of the Hard Rock Cafe in Myrtle Beach, S.C., were sealed with *Dow Corning® 756 Silicone Building Sealant-H.P.*, which features patented* stain-resistant technology that is similar to *Dow Corning® 991 Silicone High Performance Sealant*.

* Patented in the U.S., U.S. Patent # 5,338,574 and 5,357,025 and its equivalent.

One-part, primerless convenience, easy to apply

Dow Corning 991 Silicone High Performance Sealant is a one-part product that offers good, primerless adhesion to most substrates, including fluoropolymer paints. Because it's a silicone, it provides all-temperature gunnability, so it's ready to use when it's time to seal.

Popular colors

Available in white, limestone, gray, bronze and black, *Dow Corning* 991 Silicone High Performance Sealant is also available in custom colors to exactly match your vision.

20 years' worth of confidence

Dow Corning 991 Silicone High Performance Sealant is available with a 20-Year Non-Staining Limited Warranty and a 20-Year Weatherseal Limited Warranty backed by Dow Corning Corporation, the world leader in silicone technology. It's proven technology for high-performance, stain-resistant weathersealing.

When aesthetics is a concern, ask Dow Corning

Dow Corning is the global industry leader in stain-resistant sealant technology. Our proprietary technology makes *Dow Corning* 991 Silicone High Performance Sealant and *Dow Corning* 756 Silicone Building Sealant-H.P. the best choices when maintaining building aesthetics is critical.

Talk to the silicone sealant experts. Across the construction industry, around the world, *Dow Corning* is known for high-performance products, reliable product supply and outstanding technical support. It's a name you can trust.

For more information about *Dow Corning* 991 Silicone High Performance Sealant or the name of the *Dow Corning* construction materials sales representative or product distributor in your area, call 1-877-SEALANT (877-732-5268) or 1-989-496-6000.

Or visit the *Dow Corning* construction web site on www.dowcorning.com. Look for us under "Industries." The construction web site offers downloadable information about the materials and support available from *Dow Corning*, a product finder and other useful tools.

Studies show that all sealant chemistries can stain or cause streaking on porous substrates and glass and metal panels. *Dow Corning* 991 Silicone High Performance Sealant is specially formulated to resist dirt pick-up and prevent the fluid migration that can stain porous substrates and cause streaking on metal panels and glass.

LIMITED WARRANTY INFORMATION – PLEASE READ CAREFULLY

The information contained herein is offered in good faith and is believed to be accurate. However, because conditions and methods of use of our products are beyond our control, this information should not be used in substitution for customer's tests to ensure that *Dow Corning's* products are safe, effective, and fully satisfactory for the intended end use. Suggestions of use shall not be taken as inducements to infringe any patent.

Dow Corning's sole warranty is that the product will meet the *Dow Corning* sales specifications in effect at the time of shipment.

Your exclusive remedy for breach of such warranty is limited to refund of purchase price or replacement of any product shown to be other than as warranted.

DOW CORNING SPECIFICALLY DISCLAIMS ANY OTHER EXPRESS OR IMPLIED WARRANTY OF FITNESS FOR A PARTICULAR PURPOSE OR MERCHANTABILITY.
